Another sighting of 215/Dinmont

joannadailey

March 3

Our friend Jean-Marie Dupart found 2020 Nest 1A 215/Dinmont again on his February survey in Senegal. In the same spot in the Saloum Delta as in January. Here's a great photo by Jean-Marie, taken on 27 February.

(c) Jean-Marie Dupart

He was very near a French and a Norwegian osprey - ringed birds hanging out together! The following location map shows 215/Dinmont's wintering home, the Île aux Oiseaux, an important breeding site for several species of terns and gulls.

position data courtesy Jean-Marie Dupart

We're very grateful to Jean-Marie for both finding 215/Dinmont and photographing him.

There'll be a post at the end of this week about preparations for the forthcoming season in Kielder Forest.
